ABOUT THE BUILDER

My name is Jonas Kramm, I'm 24 years old, from Germany and I'm using LEGO bricks to design my own models.

I have been building all my life and love the challenge to make my creations as detailed as possible and to create shapes that defy the look of the square bricks.

LEGO is known as a toy for kids, but I try my best to show that with enough creativity and passion these bricks can be turned into anything. I post all my pictures and behind-the-scenes online to inspire builders around the globe. You can find me here:

VIKING LONGSHIP

This model from 2020 shows an accurate viking ship. Inspired by the new LEGO Viking Minifigure I researched on vikings and was inspired by their longships to build my own one.

My boat comes with seats for up to eleven vikings, ten rowers and a steersman. The mast can be put down to allow going under bridges when invading by river.

Biggest challenges were the long shape of the ship and getting all the details right. I'm very happy with how the dragon head turned out and of course viking shields can be attached to the sides of the vessel.

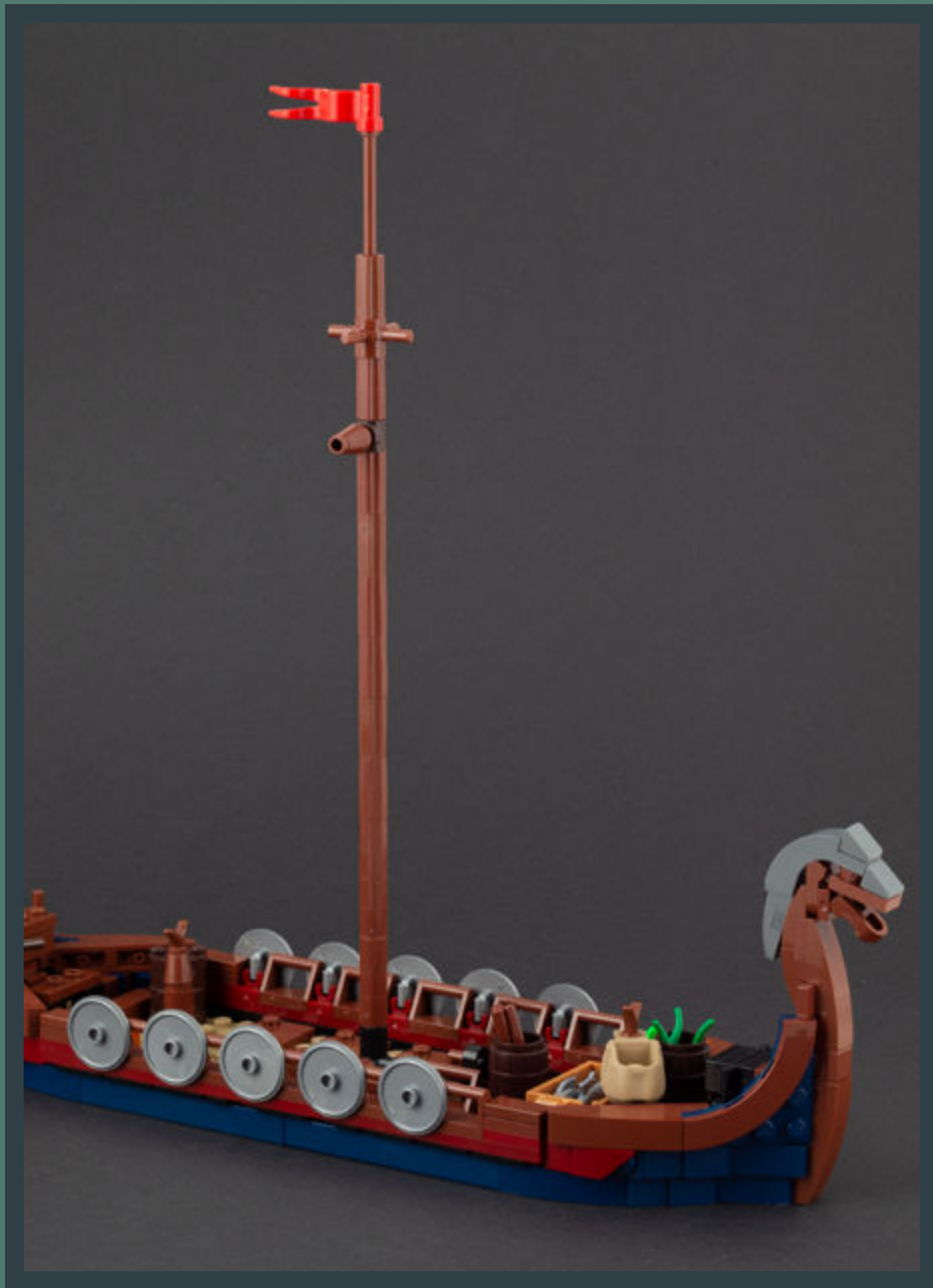

The project of my [Viking Longship](#) is on LEGO Ideas and with your support, it could become an official LEGO Set.

PICTURES

Of course you can modify your Viking Longship and for example use different shields.
